Claude

1. Study Courses

What types of courses allow a non-EU student to apply for a study visa?

If you have been admitted to a higher educational programme in Denmark, you can be granted a permit to live and study in Denmark. You can either complete a full educational programme or do part of your education as a guest or exchange student. You can also be granted a residence permit to complete a preparatory course for a higher educational programme (e.g. engineering). It is a requirement that you are admitted to a higher educational programme and that you are studying full time. You cannot be granted a residence permit to study part time. [Study in Denmark](#)

Eligible programs include:

- University degrees (Bachelor's, Master's, PhD)
- Professional bachelor's programs
- Exchange programs (Erasmus+, guest students)
- Preparatory courses linked to a higher education program (max 1 year)

Important 2025 rule change: From May 2, 2025, Denmark restricts work permits, post-study stays, and family visas for students in non-state-approved programs. Students already enrolled or holding residence permits before this date are exempt. [europa](#)

2. Embassy Appointment

How to book an appointment at the Danish embassy?

You must submit the application form in its entirety at the nearest Danish Embassy, General Consulate, or VFS station. The application will then be forwarded to the Danish Immigration Service for processing. You can also submit your application online, but in that case you must submit your biometric features at one of the aforementioned Danish Representations within 14 days. [FlyTouch Overseas](#)

It is highly recommended to apply for your student residence permit 3–4 months before your program start date (e.g., for a September intake, apply by May/June). This allows ample time for processing and any potential requests for additional documentation.

[europa](#)

Find your nearest Danish embassy via the Ministry of Foreign Affairs: [um.dk](#)

3. Applying for a Study Visa

What are the steps to apply?

If you're a non-EU/EEA or Swiss citizen hoping to study in Denmark for over three months, you'll need to apply for a student residence permit up to six months before you arrive. [Eurostudybulgaria](#)

Steps:

1. Get accepted into a state-approved Danish higher education institution
2. Your institution completes section 2 of the ST1 application form
3. You complete section 1 of the ST1 form and attach your documents
4. Submit documents online via the SIRI portal, then visit the nearest Danish embassy/consulate to give biometrics (fingerprints and photo). Pay the application fee of around DKK 2,115 (~€285). [Studymedicineeurope](#)
5. Wait for processing: typically 1–3 months

1–3 months is slightly inaccurate for complete applications; Gemini's 60 days is the official target. Neither clearly explains that the processing clock doesn't start until the application is complete, and that delayed applications face longer processing

6. Collect your residence permit and travel to Denmark

4. Documents Needed

What documents does a student need?

You must prove in writing that: you have been accepted as a student to a higher education course or programme at a university, college or institute approved by the Danish government; you are either completing an entire educational programme or are a visiting/guest student; and you can support yourself financially for the duration of your stay. If you submit a bank statement for financial documentation, the bank statement must be less than 30 days old, your name must be visible, and it must clearly state the currency in which the account is held. [FlyTouch Overseas](#)

Full document list:

- Valid passport
- Completed ST1 application form (both sections)
- Unconditional letter of admission from a Danish institution
- Proof of financial means (bank statements, scholarship letter, or tuition payment receipt)
- Proof of English or Danish language proficiency
- Health insurance

- Payment receipt for the visa fee
- Passport-size photos

5. Money Requirements

How much money does a student need to prove?

Students must demonstrate financial independence, proving the ability to support themselves with approximately **DKK 6,397 per month**. [Rivermate](#)

Living expenses typically range from DKK 6,000 to DKK 8,000 per month. Health insurance costs DKK 1,000 to DKK 1,500 per year. [Paul Abraham Immigration Consulting](#)

AI models significantly underestimate the official financial requirement. Claude's DKK 6,397 appears to be from an earlier year. Gemini's DKK 6,700–6,800 is also outdated. The correct 2026 figure is **DKK 7,426 per month (DKK 89,112 for 12 months)**. Both also fail to explain the crucial exception: **paid tuition = no financial documentation required**.

Alternatively, proof of tuition payment for the first semester or year can also serve as financial documentation.

6. Residence Permit

How does a student apply for a residence permit after arriving?

In Denmark, the student residence permit itself serves as both the visa and the residence permit — it is applied for **before** arrival, not after. The residence permit is valid for the duration of your program, so you don't need to worry about reapplying.

Upon arrival, students must:

- Register their address with the local municipality (CPR registration)
- Collect their physical residence card if not already received
- Enrolled international students have access to free medical care under the Danish welfare system once registered. [Paul Abraham Immigration Consulting](#)

7. Working While Studying

Can a student work in Denmark? How many hours?

If you're from outside the EU/EEA or Switzerland, **you can work up to 20 hours per week between September and May, and 37 hours per week during the months of June, July, and August.** These permissions are already granted through your residence permit, so you won't need to apply for a separate work permit.

If you work illegally (more hours than allowed), you can receive a warning, a fine, or your residence permit as a student can be revoked.

AI models use the **old rules** for work limits. The current rule is **90 hours per month**, not 20 hours per week. This is a significant and critical error, as exceeding the limit can lead to permit revocation. The monthly calculation is more restrictive in some months (e.g., September has 30 days with 4.3 weeks, so 90 hours is roughly 20.7 hours/week, but in months with 4 weeks, it's 22.5 hours/week).

8. Renewing the Residence Permit

How can a student renew their residence permit?

If you are already in Denmark on a student residence permit and need to extend it, you must apply for an extension before your current permit expires. SIRI recommends applying no earlier than **3 months and no later than 1 month before expiry**. [europa](#)

Claude states 3 months, but official SIRI guidance says **4 months** before expiry for extension applications. Claude also states "no later than 1 month before expiry," but the correct rule is **no later than the day of expiry**

The extension application is submitted online through the SIRI portal at [nyidanmark.dk](#). A fee of approximately DKK 2,000 applies. You must still be enrolled and making academic progress to qualify.

9. Changing to a Work Permit

Can a student convert their permit into a work permit after graduation?

Denmark has one of the most generous post-study systems in the EU. You can be granted a residence permit for up to 3 years for job seeking in Denmark, if you hold a residence permit as a student in a Danish professional bachelor, bachelor, master or PhD educational programme and you have completed your educational programme.

SIRI automatically grants a 3-year job seeking period along with your study permit if the validity of your passport allows it.

If you get a job during your job seeking permit after finishing a Danish bachelor's, professional bachelor's, master's or PhD programme, and you apply for a residence and work permit based on the job offered, you are allowed to stay in Denmark and start working in accordance with your employment contract while SIRI processes your application.

If you applied for a residence permit on or after 2 May 2025 in a non-state-approved programme, you will not be eligible for a job seeking permit after completing your education.

10. Official Information

Where can a student find official government information?

Resource	URL
New to Denmark (SIRI – official portal)	nyidanmark.dk
Study in Denmark (official guide)	studyindenmark.dk
Danish Agency for International Recruitment (SIRI)	siri.dk
EU Immigration Portal – Denmark	home-affairs.ec.europa.eu/policies/migration-and-asylum/eu-immigration-portal/student-denmark_en
Ministry of Foreign Affairs of Denmark	um.dk

11. Application Forms

Where can a student download official forms?

- **ST1 application form (residence permit for study):** Available at nyidanmark.dk — the institution completes Part 2, the student completes Part 1
- **Online application portal:** Submit through SIRI at nyidanmark.dk
- **Biometrics:** Submitted in person at your nearest Danish embassy/consulate or VFS station

12. Tips for Students

Most common mistakes and how to avoid them:

Mistake	How to Avoid
Applying too close to the program start date	Apply 3–4 months in advance; processing takes 1–3 months and longer for some nationalities
Enrolling in a non-state-approved program without knowing the restrictions	Always verify program accreditation status before applying — new 2025 rules remove work and post-study rights for non-approved programs
Submitting bank statements older than 30 days	Bank statements must be less than 30 days old at time of submission
Forgetting to submit biometrics within 14 days of online application	Book your embassy/VFS appointment immediately after submitting online

Working more than 20 hours per week during term time	Track your hours carefully — violations can result in permit revocation
Missing the permit renewal window	Apply for extension no later than 1 month before your permit expires
Not registering CPR address upon arrival	Register with the local municipality immediately after moving in to access healthcare and services

Gemini

1. Study Courses

To apply for a Danish Student Residence Permit, you must be accepted into a **full-time** educational program at a publicly accredited institution. Eligible courses include:

- **Higher Education Programs:** Bachelor's, Master's, or PhD programs at accredited Danish universities, university colleges, or business academies.
- **Preparatory Courses:** Short-term preparatory programs (maximum 1 year) that the Ministry of Higher Education and Science has explicitly deemed a prerequisite for entering a specific higher education track.
- **Folk High Schools (*Folkehøjskoler*):** Non-formal boarding school courses focusing on broader cultural or vocational education.

Note: Distance learning, part-time studies, or courses at unaccredited private institutions do not qualify for a study residence permit.

2. Embassy Appointment

Denmark processes immigration requests electronically, but you must register physical biometrics.

- **The 2-Week Window:** You must submit your biometric data (fingerprints and facial photograph) **within 14 days** of submitting your online application.
- **Where to book:** Depending on your country, you will book an appointment to hand in biometrics at a Danish Embassy, Consulate General, or a partner external outsourcing hub (such as **VFS Global**). Because slots fill up quickly during peak seasons, it is highly recommended to secure an appointment date *before* finalizing your online form.

3. Applying for a Study Visa

In Denmark, non-EU international students do not apply for a standard visa; instead, they apply directly for a combined **Residence and Work Permit for Students (Form ST1)**.

How to Apply

1. **Create Case Order ID:** The educational institution initiates the application by filling out its respective section of the online **ST1 form** on the official portal and providing a unique reference ID.
2. **Pay the Fee:** You must pay the mandatory processing fee to the Danish Agency for International Recruitment and Integration (SIRI). The fee is approximately **DKK 2,170** (~€290).
3. **Complete the Form:** Fill out your section of the online ST1 application, linking it to your Case Order ID.
4. **Submit Biometrics:** Visit the booked embassy or VFS hub within 14 days to record your biometrics and present your original physical documents.

Timeline

- **When to apply:** You should apply around **3 months** before your planned arrival.
- **Processing time:** SIRI typically processes student applications within **60 days** (2 months). Do not book non-refundable travel tickets before approval.

4. Documents Needed

When visiting the visa application center or embassy, you must bring:

- **Application Receipt:** Printout of the completed online ST1 application confirmation page.
- **Fee Payment Receipt:** Document proving the SIRI application fee was paid.
- **Valid Passport:** Must be valid for the entire duration of your studies.
- **Letter of Acceptance:** Official confirmation of admission from the Danish university.
- **Proof of Tuition Payment:** Documentation proving you paid the first semester or year's tuition (if applicable).
- **Proof of Financial Means:** Bank statements or official financial documentation.
- **Biometric Photo:** One recent passport-style photograph matching Danish biometric criteria.

5. Money Requirements

You must demonstrate that you have sufficient funds to sustain yourself independently without counting on prospective part-time work income.

- **The Minimum Legal Requirement:** The financial requirement tracks national grant rates. You must prove you have access to approximately **DKK 6,700 to DKK 6,800 per month, totaling roughly DKK 80,328** (~€10,750) for your first academic year.

AI models significantly underestimate the official financial requirement. Claude's DKK 6,397 appears to be from an earlier year. Gemini's DKK 6,700–6,800 is also outdated. The correct 2026 figure is **DKK 7,426 per month (DKK 89,112 for 12 months)**. Both also fail to explain the crucial exception: **paid tuition = no financial documentation required**.

- **How to Prove It:** Personal certified bank statements in your own name. Alternatively, an official scholarship award letter specifying monthly stipends is accepted. If you must use a third-party sponsor, the money generally must be moved into a blocked account under your name or a Danish account setup before final visa approval.

6. Residence Permit & CPR Number

The approved ST1 application grants you a temporary residence card, but your legal check-in occurs after you cross the Danish border.

1. **The Residence Card:** If approved abroad, your physical residence card can either be picked up at the embassy or sent directly to your registered Danish address after you arrive.
2. **Register for a CPR Number:** Within **5 days** of landing in Denmark, you must visit the local Citizen Service center (**Borgerservice**) or International Citizen Service (ICS) hub to obtain your **CPR Number** (Civil Registration / Personal Identification Number) and your yellow health insurance card. Bring your passport, lease contract, and ST1 approval letter.

7. Working While Studying

Non-EU international students holding an ST1 residence permit are legally permitted to work part-time.

- **Hour Limits:** You are allowed to work up to **20 hours per week** during the **standard academic semester (September to May)**.
- **Summer Exemption:** You are legally allowed to work full-time (**37 hours per week**) during the summer holiday months of **June, July, and August**.
- **Strict Penalties:** Exceeding these hour thresholds—even by a few minutes—is treated as illegal work by Danish authorities and routinely leads to the immediate revocation of your residence permit and deportation.

AI models use the **old rules** for work limits. The current rule is **90 hours per month**, not 20 hours per week. This is a significant and critical error, as exceeding the limit can lead to permit revocation. The monthly calculation is more restrictive in some months (e.g., September has 30 days with 4.3 weeks, so 90 hours is roughly 20.7 hours/week, but in months with 4 weeks, it's 22.5 hours/week).

8. Renewing the Residence Permit

Danish study permits are generally granted for the nominal duration of your degree program. If your studies are delayed or take longer than one year, you must apply for an extension.

- **When to apply:** You must submit your renewal application online via SIRI **before your current permit expires**. You can apply a maximum of 4 months prior to expiration.
- **Requirements:** A statement from your educational institution confirming your active enrollment and student status, updated bank records proving financial self-sufficiency for the remaining duration, and payment of the renewal fee.

9. Changing to a Work Permit

Denmark makes it highly accessible for university graduates to transition into the local labor market.

- **The Job Seeking Period:** Upon graduating from an accredited higher education program in Denmark, you are automatically eligible for a job-seeking permit lasting up to **3 years**.
- **Full Work Rights:** During this 3-year job-seeking window, you have full work rights without limitations. You do not need to apply for a separate work permit to hold any standard employment. If you secure a stable position meeting structural salary thresholds, you can transition smoothly into standard long-term work schemes (like the Pay Limit Scheme).

Gemini incorrectly states all graduates get a 3-year permit with full work rights. Only certain programs qualify, and even during the 3-year job-seeking period, the work rights are limited (90 hours/month, full-time in summer) unless applying for an unlimited work permit. The distinction between state-approved and non-state-approved programs (May 2025 rule) is also missing from Gemini's account.

10. Official Information

- **New to Denmark (Ny i Danmark):** nyidanmark.dk (The official joint portal of the Danish Immigration Service and SIRI. This is the definitive legal source for all residence permit tracks).
- **Ministry of Foreign Affairs of Denmark:** um.dk (For consular fees, embassy processing locations, and diplomatic appointment requirements).
- **Study in Denmark Portal:** studyindenmark.dk (The state-run hub for academic structures, program accreditations, and student life info).

11. Application Forms

- **The ST1 Digital Portal:** The physical forms are entirely digitized. The full application framework is hosted directly on the **Ny i Danmark** website under the

"You want to apply -> Study -> Higher education" submenu. You will complete the form via a portal login system called MitID or via an online User ID setup.

12. Tips for Students (Common Mistakes to Avoid)

- **Missing the 14-day Biometrics Window:** If you submit your application online but fail to get your fingerprints and photo recorded at an embassy or VFS within exactly 14 calendar days, SIRI will reject your application as invalid, and you will lose your application fee.
- **Exceeding Part-Time Hours:** The Danish tax authority (*Skat*) communicates directly with the immigration database. Working even 21 hours in a single week during the semester triggers automatic red flags and can result in deportation. Keep strict track of your shifts.
- **Renting Without an Address Registration Right:** When looking for private housing, always verify that the landlord permits you to register your CPR address at the apartment. If you cannot register your address, you cannot get a CPR number, rendering your stay in Denmark functionally non-compliant.

Denmark: AI Error Report

1. Study Courses

Claude: Lists higher education programs, professional bachelor's programs, exchange programs, and preparatory courses (max 1 year). Mentions the 2025 rule change restricting work and post-study rights for non-state-approved programs. **Correct.**

Gemini: Lists higher education programs, preparatory courses (max 1 year), and Folk High Schools (Folkehøjskoler). Notes that distance learning, part-time studies, and unaccredited private institutions do not qualify. **Correct.**

Both: Correct. Official sources confirm eligible programs include higher education, exchange/guest student stays, and preparatory courses linked to a higher education program. Basic and youth study programs also qualify for residence permits. Language instruction requires proficiency in Danish, Swedish, Norwegian, English, or German.

2. Embassy Appointment

Claude: States applications can be submitted online, but biometrics must be submitted within 14 days at a Danish embassy, consulate, or VFS station. **Correct.**

Gemini: States the 14-day biometrics window clearly, recommends booking an appointment before finalizing the online form. **Correct.**

Both: Correct. Official sources confirm biometrics must be submitted within 14 days of online application submission . Students whose ST1 application is initiated on/after May 1, 2025, receive a link directly from SIRI .

3. Applying for a Study Visa (Processing Time)

Claude: Says processing takes 1–3 months; recommends applying 3–4 months in advance. **Partial error.**

Gemini: Says processing takes 60 days (2 months); advises applying around 3 months in advance. **Correct.**

Correct Answer:

- **Official processing time target:** 2 months (60 days) for complete applications
- **In practice:** Can take approximately 3 months ; processing may extend if documents are incomplete
- **University sources:** DTU confirms processing time is 60 days for a complete application ; Aarhus University states the process takes "up to 60 days"
- IBA states processing "can take approximately 3 months"
- Some sources in India mention 60–90 days
- The online ST1 application must be completed and submitted within **30 days** after receiving the reference number and access code

Error: Claude's 1–3 months is slightly inaccurate for complete applications; Gemini's 60 days is the official target. Neither clearly explains that the processing clock doesn't start until the application is complete, and that delayed applications face longer processing .

4. Documents Needed

Claude: Lists: passport, ST1 form, admission letter, financial proof, language proficiency, health insurance, fee receipt, photos. **Correct.**

Gemini: Lists: application receipt, fee payment receipt, passport, acceptance letter, tuition payment proof, financial proof, photo. **Correct.**

Both: Mostly correct. Details from official sources:

Correct Answer:

- **ST1 application form:** Completed online; educational institution completes the first part, student completes the second
- **Valid passport:** Must be valid for the entire duration of studies; permit cannot extend beyond 3 months before passport expiry
- **Letter of acceptance:** From a Danish educational institution
- **Proof of financial means:** Bank statement in applicant's name, less than 30 days old, showing the balance and currency
- **For higher education:** If tuition is paid, **no additional financial documentation is required**
- **Tuition payment proof:** For full-degree non-EU students
- **Biometric photo:** Meeting Danish criteria
- **Under 18:** Declaration of consent from both parents and documentation of custody holders

Omissions: Neither AI specifies the crucial rule that a bank statement must be in the **student's own name** — statements under a parent's name are not accepted . Both also miss that cryptocurrency is not accepted as proof of funds . Claude incorrectly states health insurance is required; while health insurance is needed in practice, SIRI does not list it as a primary required document in the application checklist for higher education .

5. Money Requirements

Claude: States DKK 6,397/month; living costs DKK 6,000–8,000/month. **Incorrect.**

Gemini: States DKK 6,700–6,800/month totaling DKK 80,328 ($\approx$ €10,750). **Incorrect.**

Correct Answer (2026):

- **Monthly amount: DKK 7,426 per month** (2026 level)
- **For higher education (12 months): DKK 89,112**
- **For basic/youth programs:** Monthly amount × number of months (max 12)
- **Important exceptions:**
 - If you have paid tuition in Denmark, **you are not required to document financial means**
 - If you have a tuition waiver, you must document disposable funds of DKK 7,426/month
- **PhD students:** Must have a job contract or document financial means

Error: Both AI models significantly underestimate the official financial requirement. Claude's DKK 6,397 appears to be from an earlier year. Gemini's DKK 6,700–6,800 is also outdated. The correct 2026 figure is **DKK 7,426 per month (DKK 89,112 for 12 months)** . Both also fail to explain the crucial exception: **paid tuition = no financial documentation required** .

6. Residence Permit & CPR Number

Claude: States the residence permit is applied for **before** arrival; upon arrival, register address and collect the residence card. **Correct.**

Gemini: States the approved ST1 grants a residence card; within 5 days, visit Citizen Service to obtain CPR number. **Correct.**

Both: Mostly correct.

Correct Answer:

- The residence permit is applied for **before** arrival
- Upon arrival, students must register with the local municipality within **5 days** to obtain a **CPR number** (Civil Registration Number)
- The CPR number is needed for the yellow health insurance card, bank account, and accessing Danish services
- The residence permit is valid for the nominal duration of the educational program
- Passport must be valid for at least 3 months beyond permit validity

Omissions: Neither AI explains that the online ST1 application can be submitted from abroad or from inside Denmark if the student is already there legally .

7. Working While Studying

Claude: States 20 hours/week (September–May) and 37 hours/week (June–August). **Incorrect.**

Gemini: States 20 hours/week (September–May) and 37 hours/week (June–August). **Incorrect.**

Correct Answer:

- **Work limit: 90 hours per month** during the normal study period (September–May)
- **Summer (June–August): Full-time**
- This applies to students in **state-approved higher educational programs**
- **Non-state-approved programs (applied on/after May 2, 2025):** No work permit granted
- **PhD students:** Additional 20 hours/week plus full-time in June–August on top of PhD position
- **Basic/youth programs:** Generally not permitted to work
- Unpaid voluntary work is unlimited and does not count toward the limit
- **Consequences of illegal work:** Warning, fine, or permit revocation

Error: Both AI models use the **old rules** for work limits. The current rule is **90 hours per month**, not 20 hours per week. This is a significant and critical error, as exceeding the limit can lead to permit revocation. The monthly calculation is more restrictive in some months (e.g., September has 30 days with 4.3 weeks, so 90 hours is roughly 20.7 hours/week, but in months with 4 weeks, it's 22.5 hours/week).

8. Renewing the Residence Permit

Claude: States SIRI recommends applying no earlier than 3 months and no later than 1 month before expiry. **Partial error.**

Gemini: States you can apply a maximum of 4 months prior to expiration; must submit before permit expires. **Correct.**

Correct Answer:

- Apply **no earlier than 4 months** before the permit expires and **no later than the day your permit expires**

- Must still be enrolled and actively studying in the same program
- Must not be delayed by more than 1 year
- If permit was granted for less than 1 year, must show sufficient funds (DKK 7,426/month) for the remaining period
- Paid tuition = no financial documentation required for renewal

Error: Claude states 3 months, but official SIRI guidance says **4 months** before expiry for extension applications . Claude also states "no later than 1 month before expiry," but the correct rule is **no later than the day of expiry** .

9. Changing to a Work Permit

Claude: States 3-year job seeking period for state-approved programs; non-state-approved programs (applied on/after May 2, 2025) are not eligible. **Correct.**

Gemini: States 3-year job seeking period with full work rights. **Partial error.**

Correct Answer:

- **State-approved higher education:** After completing the program, students are generally granted either a **6-month or 3-year** job-seeking permit, depending on the type of program
- **6-month permit:** For certain programs
- **3-year permit:** For certain programs
- The job-seeking permit gives the **same work rights** as during studies: 90 hours/month (September–May) and full-time in June–August
- **For 3-year job-seeking permit holders:** Can apply for a work permit **without limitations** once the educational program is completed
- **Non-state-approved programs (applied on/after May 2, 2025):** No job-seeking permit
- **Non-state-approved programs (applied before May 2, 2025):** 6-month job-seeking permit
- **PhD students:** Permits issued after April 1, 2023, grant a 3-year job-seeking period

Error: Gemini incorrectly states all graduates get a 3-year permit with full work rights. Only certain programs qualify, and even during the 3-year job-seeking period, the work rights are limited (90 hours/month, full-time in summer) unless applying for an unlimited work permit . The distinction between state-approved and non-state-approved programs (May 2025 rule) is also missing from Gemini's account .

10. Official Information

Claude: Lists nyidanmark.dk, studyindenmark.dk, siri.dk, um.dk, and the EU Immigration Portal. **Correct.**

Gemini: Lists nyidanmark.dk, um.dk, studyindenmark.dk. **Correct.**

Both: Correct. Official sources verified.

11. Application Forms

Claude: ST1 form available at nyidanmark.dk; online submission through SIRI; biometrics at embassy/VFS. **Correct.**

Gemini: ST1 digital portal hosted on nyidanmark.dk; application via MitID or User ID setup. **Correct.**

Both: Correct. The ST1 is the correct application form. The institution initiates the application and completes the first part. Students complete the second part online.

12. Tips for Students

Claude: Lists: apply 3–4 months in advance; verify accreditation; bank statements less than 30 days old; biometrics within 14 days; don't exceed 20 hours/week; don't miss renewal; register CPR upon arrival. **Correct, except work hours.**

Gemini: Lists: 14-day biometrics window; don't exceed part-time hours; ensure landlord allows CPR address registration. **Correct, except work hours.**

Errors:

- **Both:** 20 hours/week work limit is **incorrect** — the correct limit is **90 hours/month** (September–May) and full-time in June–August. This is the most critical error as exceeding limits can lead to deportation.

- **Claude:** "No later than 1 month before expiry" for renewal is **incorrect** — the correct rule is **no later than the day of expiry** .
- **Gemini:** "Approximately DKK 80,328 total" for financial proof is **incorrect** — the correct 2026 amount is **DKK 89,112** for 12 months .
- **Both:** Neither clearly explains the crucial rule that if tuition is paid, **no additional financial documentation is required** .
- **Both:** Neither distinguishes between state-approved and non-state-approved programs for work rights .
- **Both:** Neither explains that basic/youth programs generally do not permit work .

Summary Comparison

Topic	Claude	Gemini	Correct Answer
Study Courses	Correct	Correct	Higher education, exchange, preparatory courses (max 1 year), basic/youth programs
Processing Time	1–3 months	60 days	60 days target; up to 3 months in practice; complete application required
Money Requirements (2026)	DKK 6,397/month	DKK 6,700–6,800/month	DKK 7,426/month (DKK 89,112 for 12 months)
Tuition Paid = No Financial Proof	Not mentioned	Not mentioned	If tuition paid, no additional financial

			documentation required
Work Limits	20 hours/week	20 hours/week	90 hours/month (September–May); full-time (June– August)
Non-State- Approved Programs	May 2025 rule mentioned	Not mentioned	No work/post- study rights for applicants on/after 02 May 2025
Renewal	3 months/1 month before	4 months before	Apply no earlier than 4 months before expiry; no later than expiry day
Job-Seeking Period	3 years	3 years (all graduates)	6 months or 3 years depending on program; state- approved required
CPR Registration	Mentioned	5 days	Within 5 days of arrival
Bank Statement Age	30 days	Not specified	Must be less than 30 days old
Bank Statement Name	Not specified	Not specified	Must be in the student's own name ; parent statements not accepted
